## Model 80 Cutter

A high-capacity cutter in small format for cutting batches of fibers or metering cut fibers into mixes. 4" (102 mm) working width. All components are portable and designed for easy removal and convenient servicing.

Cut length configurations from 1/8" (3 mm) up. Maximum capacity 400 # (180 kg) per hour with 6 strands.

Model 80 Cutter, Variable Speed, Feed Side View

Repeatable cutting pressure is set with a single knob and maintained constant with two die springs.

Variable speed or fixed speed drives for all standard voltages, and a wide range of speeds.

Positive-drive replaceable anvil sleeves of tough polyurethane and rubber compounds developed for long service life.
